

Nut & Bolt Shelving

Galvanised Steel

Our range of Nut & Bolt Shelving is the ideal economical choice when it comes to shelving and storage. With various heights and depths available, there is will always be an option that best suits your unique storage needs. Side and back panels are also available for Nut & Bolt shelving, and in our Coated range we also offer a range of shelf dividers and drawers.

When more than one shelf is required, these shelves can easily be bolted together to create rows, as well as back-to-back aisles.

Nut & Bolt Shelving is well suited for storage, archiving, small parts, and domestic storage to mention a few.

Galvanised Nut & Bolt Shelving is well suited for storing food products, chemicals and general storage. It works well in fridges and freezers as its galvanised finish means that it does not rust.
