

## Shelf Bins – The Ultimate Organisers

Shelf Bin plastic storage bins are durable and inexpensive space savers! These medium to small sized storage containers are ideal for organising small parts and are used in many industries including:

- Computer parts
- Pharmaceutical
- Medical storage
- Motor vehicle part storage

Shelf Bins are the ideal storage solution for offices, small businesses, manufacturing and warehousing as they ensure MAXIMUM STORAGE PER SQUARE!

There are 6 sizes of Shelf Bins with standard colours in black and blue.

## Shelf Bins – The Ultimate Organisers

### Window Labels

Each bin can be labelled separately with an ID card/label and protective window at the front or back of each bin and on the divider.

### Shelf Bin Shelving Units

*Single Sided (Above) or  
Double Sided (Right)  
Shelf Bin Nut & Bolt Kits*

Shelf Bin Kits with Nut & Bolt Shelving provide a practical, all-in-one storage solution for organising small parts and components. Combining durable plastic shelf bins with a strong, powder-coated nut and bolt shelving unit, this kit is ideal for workshops, warehouses, retail stores, and storerooms.

Shelf Bin Kits with a Lockable Steel Cupboard offer a secure and space-efficient solution for storing small parts, tools, and valuable items. By combining durable shelf bins with a robust steel cupboard, this system keeps contents protected while maintaining a clean and organised layout.

### Back Stopper

The Shelf Bin Back Stopper is a practical accessory designed to improve accessibility and organisation. By clipping onto the back of a shelf bin, it allows the bin to tilt forward when hooked onto the shelf above, providing better visibility and easier access to stored items.

Furthermore, they prevent bins from shifting or falling, especially in busy work areas. As a result, your storage remains safe, organised, and visually consistent.

### Front Stopper

The Shelf Bin Front Stoppers are a practical accessory designed to improve accessibility and organisation. By clipping onto the front of a shelf bin, it prevents the Shelf bin from sliding backwards, providing better visibility and easier access to stored items.

Furthermore, they prevent bins from shifting or falling, especially in busy work areas. As a result, your storage remains safe, organised, and visually consistent.
