Shelving & Storage Solutions

Nut & Bolt Shelving

Econo Shelving

This budget friendly nut and bolt shelving option is made up of 1.5mm galvanised steel uprights and 0.8mm shelf supports to provide a strong shelving frame. Due to the huge increase in the price of steel we have replaced the traditional steel shelf with MDF wood or sometime known as Supawood. These decks are placed onto the shelf frame to complete the shelf.

With many manufacturers resorting to using thinner steel to cut cost which in turn weakens the shelving frame structure. Our Econo Shelving option does not compromise on safety and reliability for our frames, ensuring that we can still offer a solution that will not let you down.

Our weight capacity for our MDF shelves are as follows:

- **Light Duty Econo** unit has a UDL capacity of 50Kg per shelf.
- **Medium Duty Econo** has a UDL capacity of 100Kg per shelf.
- **Heavy Duty Econo** unit has a UDL capacity of 150Kg per shelf.

Please contact us if you would like an alternate form of decking such as Shutter board or Chipboard or Melamine.

We also offer our Econo Shelving without decking (frame only) which means you can supply your own decking whether it be MDF, Shutter board, Chipboard or Melamine. This option also reduces shipping and transport costs.

Need an extra tier (shelf) - no problem - we sell these as well.
